garimadua2301@gmail.com | +91-7898933230 | Noida, India | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science (Data Science) from Bennett University (CGPA: 8.61) with hands-on industry experience fine-tuning LLMs at Outlier.ai and building end-to-end ML pipelines. Published researcher at ICCSCE-2025. Proficient in Python, TensorFlow, Scikit-learn, and NLP — available immediately for Data Science or ML Engineering roles..

EXPERIENCE

Machine Learning Engineer | [Outlier.ai](#)

Jan 2025 – Apr 2025

- Fine-tuned multiple Large Language Models (LLMs) to improve response accuracy and contextual coherence, evaluated using systematic performance benchmarking.
- Engineered preprocessing pipelines for structured and unstructured datasets, reducing data quality issues and improving downstream model training efficiency.
- Designed and ran controlled experiments using custom performance metrics to assess model behavior across diverse input distributions.
- Contributed to cloud-based deployment workflows, ensuring models met production readiness standards.

PROJECTS

CareerForge – AI Career Assistant (*Python, Streamlit, LangChain, ReportLab*)

June 2025

- Architected a hybrid resume-to-job evaluation engine combining rule-based skill matching with LLM-driven multi-dimensional scoring (5 categories, 0–100 scale), enabling explainable feedback.
- Designed a structured JSON-based LLM scoring pipeline (max 800 tokens, controlled temperature) with automated PDF and email report generation via ReportLab.

Hospital Emergency Room Analytics Dashboard (*Power BI, SQL, DAX*)

Feb 2025

- Analyzed 9,216 patient records over 19 months (Apr 2023 – Oct 2024) to surface operational and demographic trends for hospital management.
- Computed key KPIs using DAX: 50.04% admission rate, 35.26-min avg. wait time, 4.99/10 satisfaction score; identified high referral volume in General Practice (1,840 cases) for resource reallocation.

Sentiment Analysis on E-commerce Reviews (*Python, TF-IDF, Scikit-learn*)

Sep 2024

- Built an end-to-end sentiment classification pipeline using TF-IDF feature engineering and Decision Tree modeling on e-commerce review data.
- Implemented full NLP preprocessing (tokenization, stopword removal) and persisted trained artifacts (model.pkl, vectorizer.pkl) for production reuse.
- Deployed a Streamlit-based inference interface enabling real-time review sentiment prediction.

Stock Market Forecasting using LSTM (*Python, TensorFlow, Keras*)

Nov 2023

- Designed a deep learning time-series model using LSTM networks to forecast stock prices, addressing long-term dependency challenges via gated memory architecture.
- Trained model using stochastic gradient descent with varying input window sizes; visualized prediction trends through an interactive analytics dashboard.

TECHNICAL SKILLS

Languages: Python, SQL, Java

Machine Learning: Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, LightGBM

NLP & LLMs: HuggingFace Transformers, LangChain, Prompt Engineering, TF-IDF

Data Engineering: Apache Spark, Hadoop, SQL-based ETL & transformation

Data Analysis & Viz: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel

Tools & Frameworks: Streamlit, FastAPI, Flask, Git

EDUCATION

B.Tech – Computer Science (Data Science Specialization) | [Bennett University](#)

Sep 2022 – May 2026

CGPA: 8.61 | Relevant Coursework: Machine Learning, Deep Learning, NLP, Big Data (Hadoop, Spark), SQL, DSA, Operating Systems, Computer Networks

Senior Secondary (Class XII) – Science | [SKSGM](#)

2021

Percentage: 95.2%

RESEARCH & ACTIVITIES

Future Directions in Fog Computing: Resource Allocation Strategies – Published & Presented at ICCSCE-2025 (Apr 2025). Conducted a comparative analysis of resource allocation techniques in fog computing environments and presented findings to an international academic audience.

Smart India Hackathon (SIH) – National-level competition (Aug 2024). Designed and presented an industry-focused technical solution addressing real-world constraints under time-limited, competitive conditions.

CERTIFICATIONS

Improving Deep Neural Networks – Coursera (Apr 2025) | IBM ML Professional Certificate (Apr 2024) | IBM Data Analyst Professional Certificate (Nov 2023) | Data Structures – UC San Diego/Coursera (Nov 2023)
